SUMMARY

Second-year Computer Science student from Bicol using AI-assisted development to build community-focused software: a 9,000-entry Bicol dictionary, scholarship navigator for provincial students, and award-winning nutrition subsidy prototype. Defines product requirements and feature logic, evaluates technology stacks and architecture choices with AI, uses AI to generate implementation code, tests behavior, troubleshoots issues, and deploys applications built with TypeScript, Next.js, and PostgreSQL.

EXPERIENCE

Backend AI Engineering Intern (Educational Program) - FlyRank AI

July 2026 - Present

Unpaid, remote, self-paced educational portfolio program

- Working through independent Backend AI Engineering assignments covering CRUD APIs, databases, containerization, authentication, web scraping, AI API integration, background jobs, and report generation; work is published through personal public GitHub repositories.

PROJECTS

BANTAYOG - Blockchain-Backed Subsidy System

July 2026

Next.js, Polygon Amoy Testnet, Gemini API

- Built a blockchain-backed nutrition subsidy prototype that uses QR Nutri-Passes to restrict redemptions to approved food purchases.
- Integrated Gemini-powered product recognition with settlement on the Polygon Amoy testnet; served as backend developer in a four-person team.

Bicol-Tagalog-English Dictionary

May 2026 - Present

Next.js, TypeScript, Supabase, PostgreSQL | bicol-app.vercel.app | github.com/Yahiro025/bicol-app

- Built and deployed a full-text search platform for 9,000+ dictionary entries using Next.js, TypeScript, Supabase, and PostgreSQL.
- Added PostgreSQL indexing for sub-second queries and designed the data model to support additional Philippine regional languages.

TANGLAW - AI Scholarship Navigator

May 2026 - Present

Next.js, TypeScript, Retrieval-Augmented Generation | tanglaw-project.vercel.app | github.com/Yahiro025/tanglaw

- Co-developed a retrieval-augmented chatbot in a three-person PUP team to answer scholarship questions from verified source records.
- Grounded responses in curated scholarship data rather than model recall, helping students navigate scattered eligibility information.

EDUCATION

Polytechnic University of the Philippines - NCR Campus

2025 - Present

BS Computer Science, 2nd Year | GPA: 1.32 (1.00 is highest)

TECHNICAL SKILLS

Languages: TypeScript, C

Web and Data: Next.js, React, Tailwind CSS, PostgreSQL, Supabase, Prisma

AI: Gemini API integration, Retrieval-Augmented Generation

Tools and Deployment: Git, GitHub, Vercel, Railway, Render

AWARDS AND LEADERSHIP

1st Runner-Up, GDG on Campus PUP SparkFest Hackathon - BANTAYOG; 15 teams, 10 finalists (July 2026)

Top 20 Finalist, Cryptita Plays Builder Showcase at WOCEE - BANTAYOG (2026)

Media Partnership Lead, Seekers Guild (August 2026 - Present)
